Nixa Fire
Protection
District

Press Release

July 19, 2022

NO OPEN BURNING, NIXA

Due to the extreme heat, lack of rain, and low humidity forecasted for the next several weeks, the Nixa Fire Protection District is not permitting open burning within the fire district. Nixa Fire District says all forms of open burning are not permitted, including, but not limited to:

- Recreational fires
- Burn barrels
- Agricultural and ditch clearing
- Previously approved air curtain incinerator permits

Residents are asked to properly dispose of cigarettes and other smoking materials. Anyone who plans to be grilling outside is asked to dispose of charcoal by placing it in a metal container after dousing it with water. We are also asking for people to refrain from using fireworks.

As soon as the Nixa area gets some measurable amounts of precipitation, we will lift this burn restriction.
